

Muhammad Haris

Email: kingharis584@gmail.com

Location: Pakistan

Field: IT Student at Sindh Agriculture University

Career Objective

Motivated IT student with hands-on experience in Python development and data entry. Seeking a challenging role where I can apply my programming knowledge, grow my technical skills, and contribute to innovative projects in a tech-driven environment.

Skills

Programming Languages: Python, Java, C, C++

Projects

- Snake Game using Pygame
 - Designed a fully customized Snake game with features like edge wrapping, multiple food types, scoring system using JSON, sound effects, and background music.
- Parking Lot Management System (Java)
 - Developed a full-stack Parking Lot Management System using Java with frontend, backend, and local database integration.
 - Implemented vehicle entry/exit handling, parking slot allocation, and record management.
 - Integrated SQL database using JDBC for persistent data storage.
 - Applied Object-Oriented Programming (OOP) principles and backend logic.
- Hotel Room Booking System (Tkinter)
 - Built a GUI-based hotel room booking app with logo, image slider, price-based room selection and booking confirmation.
- Restaurant and Calculator Backend Systems
 - Created backend logic for restaurant order processing and a functional calculator in Python.

Certifications

- Python for Everybody – Coursera
- AI Foundations: Essential Training – Coursera

Education

Bachelors in Information Technology (Ongoing)

Sindh Agriculture University, Pakistan

Experience

- Data Entry Intern – 1 Month
 - Performed accurate and efficient data entry using Excel and digital forms.
 - Focused on detail, speed, and consistency in managing large datasets.
